Bosch Delivers Unlimited Instantaneous Hot Water and 360 Degree Installation with New Tronic 3000 Water Heater

WATERTOWN, MASS., (Aug. 10, 2020) - Bosch Thermotechnology announced today the Bosch Tronic 3000, a series of electric instantaneous water heaters that drastically minimize the wait time for hot water in light commercial applications. The new series includes four new models and marks the first step towards Bosch's planned cutting-edge, new dynamic electric instantaneous water heater portfolio.

The Bosch Tronic 3000 is designed for easy installation directly at the point of use, eliminating the wait time for endless, instantaneously heated hot water. The Bosch Tronic 3000 is flow activated and, depending on the unit, can be triggered with as little as 0.3 GPM-0.7 GPM. The unit conserves energy by automatically shutting off when the water flow ceases.

Bosch Tronic 3000 features a dynamic design that can be rotated in any orientation for easy installation regardless of the location of the connecting water pipes. This provides versatile, 360 degrees installation options that contractors will love, while allowing wholesalers to reduce their total number of SKUs to stock.

The Bosch Tronic 3000 has a roundagon design allowing it to be in-style and seamlessly blend into any space. This clean design also means it's simple to use, with no interface or complicated controls for its user. The Bosch Tronic 3000 is ideal for most any project, and stands apart from other models on the market due to its compact, lightweight, and space saving features.

Additionally, the Bosch Tronic 3000 features an LED light that illuminates to indicate water is running. This makes it easy for installers or service technicians to tell that the unit is working and the power is on.

"We set out to create an electric water heater that eliminated some of the most common problems in light commercial applications - having complicated installations and lacking unlimited, instant hot water," said Dan Moffroid, Director of Product Management. "The Bosch Tronic 3000 solves both of those issues, and the 360 degree install provides engineers, specifiers, and plumbers a simplified installation and easy hot water access."

Depending on its intended application, the Bosch Tronic 3000 comes in four models with various power inputs to ensure that buyers have proper model selection for adequate outlet water temperature. Varying in their technical specifications, the product range includes the US3-2R, US4-2R, US7-2R, and US9-2R models.

The Bosch Tronic 3000 is perfect for light commercial applications like restaurants, airports, hotels, offices, gas stations, doctor's offices, warehouses, stadiums, and more. The Bosch Tronic

3000 is also compatible with residential use where thermostatic temperature control is not required, like in fixed-flow applications and applications with mixing valves.

Following Bosch's continued commitment to providing high-quality products and services, the Bosch Tronic 3000 holds a number of certifications, including the cUL499 (electric heating appliances) USA/CA, the low lead certification (NSF/ANSI 372) -IAPMO USA, the ANSI Z21.20/CSA C22.2 No 64 USA/CA, and more. The Bosch Tronic 3000 also holds an IPX4 certification, and regardless of the product's orientation, protects against moisture and dust and minimizes potential risks.

The Bosch Tronic 3000 is warranted for five years on the heat exchanger, and two years for all other product components.

The Bosch Tronic 3000 is available immediately for individual purchase. For more information on the Bosch Tronic 3000, please visit <https://www.bosch-thermotechnology.us/us/en/ocs/residential/tronic-3000-1098974-p/>

About Bosch Thermotechnology Corp.

Bosch Thermotechnology Corp. is a leading source of high quality heating, cooling and hot water systems. The Company offers Bosch tankless, point-of-use and electric water heaters, Bosch and Buderus floor-standing and wall-hung boilers, Bosch and FHP water-source, geothermal and air-source heat pump systems, as well as controls and accessories for every product line. Bosch Thermotechnology is committed to reinventing energy efficiency by offering smart products that work together as integrated systems that enhance quality of life in an ultra-efficient and environmentally friendly manner.

Bosch strives to bring the most energy-efficient and environmentally responsible products to global consumers. In delivering the best products at affordable prices to our markets, Bosch has established multiple collaborations and joint ventures on a global scale to bring the latest technologies to North America. All global manufacturing facilities must adhere to stringent quality standards in order to provide the trusted Bosch brand. For more information, visit www.boschheatingandcooling.com

About Bosch

Having established a regional presence in 1906 in North America, the Bosch Group employs 34,600 associates in more than 100 locations, as of December 31, 2019. In 2019 Bosch generated consolidated sales of \$14.4 billion in the U.S., Canada and Mexico. For more information, visit www.bosch.us, www.bosch.ca and www.bosch.mx.

The Bosch Group is a leading global supplier of technology and services. It employs roughly 400,000 associates worldwide (as of December 31, 2019). The company generated sales of 77.7 billion euros in 2019. Its operations are divided into four business sectors: Mobility Solutions, Industrial Technology, Consumer Goods, and Energy and Building Technology. As a leading IoT provider, Bosch offers innovative solutions for smart homes, Industry 4.0, and connected mobility. Bosch is pursuing a vision of mobility that is sustainable, safe, and exciting. It uses its expertise in sensor technology, software, and services, as well as its own IoT cloud, to offer its customers connected, cross-domain solutions from a single source. The Bosch Group's strategic objective is to facilitate connected living with products and solutions that either contain artificial intelligence (AI) or have been developed or manufactured with its help. Bosch improves quality of life worldwide with products and services that are innovative and spark enthusiasm. In short, Bosch creates technology that is "Invented for life." The Bosch Group comprises Robert Bosch GmbH and its roughly 440 subsidiary and regional companies in 60 countries. Including sales and service partners, Bosch's global manufacturing, engineering, and sales network covers nearly every country in the world. The basis
